

#586
BLUE GUARD
WINDOW/SURFACE PROTECTION TAPE

DESCRIPTION

The #586 is unique PVC protective film tape. The PVC film provides puncture resistance and flexibility. When applied to flat surfaces, film appears to “wet out” and form a protective layer. Low tack, firm acrylic adhesive removes cleanly from most surfaces – even with extended dwell.

FEATURES

Originally designed for use as a long term protective film for glass windows in commercial buildings. Both film and adhesive are UV stabilized and offer up to 365-day (1 year) protection. But given it’s unique composition, 586 can be used in protection of industrial requirements, such as aluminum signage, glass retail shelves, plastic extrusions, etc.

PHYSICAL PROPERTIES

Film Material	PVC
Color	Blue
Tape Thickness	3.0 mil
Adhesion System	Acrylic
Peel Adhesion	5.5 oz/inch
Tensile Strength	14 lb/inch
Elongation	290%

Physical characteristics shown are averages from tests recommended by our own procedures. A particular roll may vary slightly from these averages. The buyer should determine the suitability for his own use.
