

# CHR® 2300

## UHMW Pressure Sensitive Adhesive Tape

**CHR 2300** is manufactured from UHMW (Ultra High Molecular Weight) polyolefin film coated with rubber adhesive.

### Features/Benefits

**CHR 2300** exhibits excellent abrasion resistance and it has a low coefficient of friction, making it an excellent protection for surfaces or bearings that experience heavy wear. **CHR 2300** is more economical than PTFE tapes. The high-temperature, high-tack rubber adhesive adheres readily to most dry, clean surfaces, firmly anchoring the product in place.

### Availability

Factory stock for 2300 is in master rolls 33 m x 610 mm (36 yd x 24 in). Rolls can be slit in widths from 6.35 mm to 610 mm (0.25 in to 24 in). This product is supplied with a film inter-liner, which protects the adhesive, facilitates die cutting and peels off easily.

### Applications

**CHR 2300** tapes can be used to provide an abrasion-resistant, anti-stick, anti-friction surface at temperatures up to 107°C (225°F). **CHR 2300** is frequently used to line chutes and conveyors. **CHR 2300** is often applied to guide rails to reduce noise levels in glass bottling plants. This tape is also used to replace desk drawer bearings to provide silky smooth, friction-free drawer movement.
