

tesa® 52330

Plate mounting in flexographic printing, especially corrugated board postprint

PRODUCT INFORMATION

Product Description

tesa® 52330 is especially well suited to plate mounting in corrugated board postprint, due to its ideal adhesive characteristics and optimal backing properties.

Adhesive properties

- High adhesive coating weight to ensure the secure mounting of plates that have been "back ground"
- The adhesive properties also allow secure vertical storage of mounted plates

Backing properties

- tesa® 52330 is very flexible, yet stable, due to its fabric backing material and therefore are ideally suited for plates in corrugated board postprint
- The stability of the backing also ensures that mounted plates can be stored vertically

Additional properties

- tesa® 52330 has a creped paper liner to prevent the formation of air bubbles during plate mounting

Main Application

tesa® 52330 is especially well suited to plate mounting in corrugated board postprint, due to its ideal adhesive characteristics and optimal backing properties.

Technical Data

■ Backing material	cloth	■ Type of liner	creped paper
■ Type of adhesive	natural rubber	■ Thickness category	380 µm 15 mils
