

tesa® 56402

Packaging Hand Dispenser Superior Snapshot 50

PRODUCT INFORMATION

Product Description

The tesa® 56402 hand dispenser is a robust industrial device that takes tesa tapes up to 50 mm width. Its system of 2 application rollers offers easy handling and a special injury-protection (blade-protection). The tape is cut by pressing the trigger on the handle. The continuously adjustable tension control allows correct dispensing even of easy unwinding tesa tape.

Main Application

Put the tesa 56402 dispenser on the carton and pull it towards yourself. The tape is unwound and pressed down by the 2 rubber contact rollers. To cut the tape, press the trigger and continue moving the dispenser. Threading: The tesa roll is put on the tape wheel such that the adhesive side of the tape faces the handle. Pull the end of the tape between the tape guide roller and the return stop plate until the tape is free of wrinkles.
